Department of Information and communication Engineering

TP02: Set Theory

Cours: Theory of Computer Science

Lecturer: KONG PHUTPHALLA

Student: VEN THON

ID: e20191250

Group: I3-GIC-C

Year: 2022-2023

- 1) if we have a set  $N=\{6,4,8,10\}$  and  $P=\{10,4,6,8,8\}$  . Is  $N=P$ ?  
 $\Rightarrow$  is  $N=P$ .
- 2) Differences between real and rational number:  
 . Real number is a value of a continuous quantity that can represent a distance along a line, Real number include both rational and irrational number (12.3,-12, $\pi$ ,...)  
 . Rational number is a type of real numbers, which is in the form of  $p/q$  where  $q$  is not equal to zero (1.5, 2.6, -3.8, 18,.....)
- 3) If we have a set  $L=\{d,b,p,p\}$  and  $Q=\{p,d,d,c,p\}$  Is  $L$  subset  $Q$ ?  
 $\Rightarrow$  No,  $L$  is not subset  $Q$ .
- 4) What is cardinality of  $A=\{X \in N + |x < 168\}$ ?  
 $\Rightarrow$  Cardinality of  $A$  is  $|A|=167$ .
- 5) What is cardinality of  $B=\{e,\{e,e\},\{e,a,e\},c,\{c,e,c,e\}\}$ ? Power?  
 $\Rightarrow$  The cardinality of  $B=5$   
 $\Rightarrow$   $P(A)=2^B=2^5=32$ , So that power is 32.
- 6) If we have a set  $A=\{1,3,5\}$  and  $B=\{9,6,3,1\}$  what is  $A$  union  $B$ ?  $A$  intersection  $B$ ?  
 $A$  difference  $B$ ?

$A$  union  $B = A \cup B = \{1,3,5,6,9\}$

$A$  intersection  $B = A \cap B = \{1,3\}$

$A$  difference  $B = \{5\}$

- 7) Find  $(A \cap B) \cup (B \cap C)$ ?

A	B	C	$A \cap B$	$B \cap C$	$(A \cup B) \cup (A \cap B)$
0	0	0	0	0	0
0	0	1	0	0	0
0	1	0	0	0	0
0	1	1	0	1	1
1	0	0	0	0	0
1	0	1	0	0	0
1	1	0	1	0	1
1	1	1	1	1	1
